FOR IMMEDIATE RELEASE

## **Convert Your Negatives and Slides into 23 Megapixel Hi-Res Digital Images. Pana-Vue's New Pana-Scan Quickly and Easily Preserves Your Precious Memories.**

We all know how many old photos, slides and negatives people have in drawers and shoeboxes. We ALL have them. They represent cherished memories that we would love to see and share with our friends and families. We're just waiting for an easy, affordable way to turn them into high-res digital images so we can view them, share them, email them, print them, store and organize them.

The wait is over! The **New 23 Mega-Pixel Pana-Vue® Pana-Scan™ Slide & Film Scanner** enables you to quickly and easily convert your cherished slides and negatives into high resolution 23 megapixel digital images without the need to be connected to a computer. You can show all of your precious images and memories on a TV, or share, email, print, archive and store them too.

Just place your slides or negatives in one of the supplied holders, insert the holder into the **Pana-Scan™**, view the images on its 2.4" LCD screen, press the copy button and the images are stored on an SD memory card ready for you to use in your computer, view on a TV screen, share, print, email, etc.

The **Pana-Scan™** includes a Stack Loader to make scanning as many as 25 slides at a time fast and easy. And the 23 megapixel images are suitable for everything from social media to printing and framing on your wall!

The **Pana-Scan™ Stand Alone 23MP Slide & Film Scanner** is compatible with Windows® 10, 8, 7, Vista & XP Service Pack II (32 bits/ 64 bits), and MAC 10.5 & above. It uses a USB 2.0 port on your computer for both communication and power when used as a card reader for viewing stored images. When scanning, the **Pana-Scan™ Stand Alone 23MP Slide & Film Scanner** operates on either the rechargeable battery (included) or AC adapter (included), or power from computer's USB port.

The **Pana-Vue® Pana-Scan™ Stand Alone 23MP Slide & Film Scanner** comes with ArcSoft MediaImpression2™ software for both MAC and PC. Once you've scanned your images, you can use MediaImpression2™ or any other photo editing app to edit, crop and enhance your new digital images in your computer, tablet or phone.

The **Pana-Vue® Pana-Scan™ Stand Alone 23MP Slide & Film Scanner** is available from retailers nationwide, priced at \$169.
