GENERAL PURPOSE 60 MINUTE TIME

Two grounded outlets allow you to automatically switch external appliances with the 171 timer. Control one appliance with a switch which will turn it off or on when time elapses. The other outlet will always turn off when time elapses independent of the switch. Features a permanent plastic boot over the power and outlet control switches to prevent contamination or corrosion.

ELECTRIC TIMER

The Model 451 dual memory switching timer has two independent, separately programmable memories allowing for operation as a single-cycle switching timer as well as an auto-start feature for continuously cycling. It has easily adjustable controls for display brightness, AC outlet power, audio signal choices and countdown time ranges. The three countdown time ranges are minutes up to 99, seconds up to 99 and tenths of seconds up to 9.9. The three audio signal choices are off, metronome and end-of-cycle tone.

FOOTSWITCH

The Model 565 Timer Footswitch efficiently controls all electronic timers. Compact and attractive in a durable, formed steel case, the 565 Footswitch features heavy tread on the treadle and a skid-proof base to make use even easier. Light pressure operates the 565, leaving you less fatigued. An 8' cord is included.

All GraLab electronic timers have an output jack, which provides an output signal to control devices whose maximum rating is no more than 30 milliamperes at 30 volts DC.
