MARUMI Super DHG ND500 & ND1000 Filters

Pg.10

Super DHG Features

- **Hard Protection** - Even with "heavy duty use" it guards the filter's surface from scratches.
- **Water & Oil Repellent** - Just wipe off any water or oil spots.
- **Antifouling** - Keeps the lens surface free of dust and dirt.
 - Proprietary ultra-low reflection coating increases light transmission.
 - Lens' outer rim is blackened to minimize internal reflection.
- **Satin smooth, ultra thin, matte-black metal filter frame** further minimizes reflection.

Archival Pages

Pgs. 6-8

Pg. 9

FLOTONE® Graduated Background Material

Pg.18

FLOTONE graduated background is a beautiful synthetic PVC material for professional photographers, art directors, graphic designers, etc. These smoothly graduated backgrounds afford interesting lighting effects without losing valuable time setting up and doing trial shots.

EXUS

- New Super Coating!
- Better Frames!
- Stronger Glass!
- Greater Transmission!
- Less Reflections!

Pg.11

DHG NEUTRAL DENSITY

- Create blur and motion effects
- Decrease depth of field for selective focus
- Avoid over-exposure

Pg.14

FIT + SLIM

- Ultra-Slim Frame & Lens Cap Attachable
- Light-Weight
- Multi Coating Glass & Satin Finished Frame for low reflections
- Eco-Friendly Filters

Pg.15

MARUMI

SUPER DHG

**Digital Cameras Need
Special Filters**

Marumi DHG Filters eliminate the flare and ghosting prevalent when the CCD or CMOS chips in digital cameras convert light into electrical signals

Digital High Grade Filters

Pana-Vue[®] Pana-Scan[™]

Portable Stand-Alone
SLIDE & FILM SCANNER
35mm Slides & Negatives,
110 & 126 Instamatic Negatives

23
MEGA
PIXELS

The Pana-Scan[™] Portable Stand Alone Slide & Film Scanner enables you to **quickly and easily convert your cherished slides and negatives into high resolution 23 megapixel digital images** without the need to be connected to a computer. You can show all of your precious images and memories on a TV, or email, share on social media, print and archive.

Just place your slides in the **included stack loader**, or film in one of the supplied holders, insert the holder into the Pana-Scan[™], view the images on the **3.5" LCD screen**, press the **OK/** button and the images are stored on an SD memory card ready for you to use in your computer, share on social media, email, archive or view on a TV.

The Pana-Scan[™] Stand Alone Slide & Film Scanner is compatible with Windows[®] 10, 8, 7, Vista & XP Service Pack II (32 bits/ 64 bits), and MAC OS 10.5 & above. It is powered by either the included AC adapter or included USB cable attached to a computer.

The Pana-Vue[®] Pana-Scan[™] Stand Alone Slide and Film Scanner does not require any additional software or drivers to run on your computer. Just use your favorite photo imaging & editing software.

Pana-Vue® Pana-Scan™ 120 STAND-ALONE TRANSPARENCY & FILM SCANNER

120, 220 & 620 (6x4.5, 6x6, 6x7, 6x8, 6x9 images)

The Pana-Scan™ Portable Transparency (slide) & Film Scanners enable you to **quickly and easily convert cherished slides, transparencies and negatives into high resolution 14 megapixel digital images** without the need to be connected to a computer. You can show all of your precious images and memories on a TV & print, share, email, archive and store them too.

Just place your transparencies or negatives in one of the supplied holders. Insert the holder into the Pana-Scan™. View the images on the 2.4" LCD screen. Press the copy button. The images are stored on an SD memory card ready for you to use in your **computer, view on a TV screen, print, email, etc.**

The Pana-Scan™ Portable Transparency (slide) & Film Scanners are compatible with Windows® 10, 8, 7, XP Service Pack II, & Vista (32 & 64 bit) and Mac OSX 10.5 & above. They use a USB 2.0 port on your computer for both communication and power when used as a card reader for viewing stored images. When scanning, the Pana-Scan™ APA120 operates on an AC adapter (included) or your computer's USB port.

The Pana-Scan™ Portable Transparency (slide) & Film Scanners come with ArcSoft MediaImpression2™ software for both MAC and PC to allow you to **edit, crop and enhance your new digital images in your computer.**

Pana-Vue® Pana-Scan™ Portable Stand-Alone COMBO SCANNER

Prints, 35mm Slides & Negatives, 110 & 126 Negatives

Go Digital with the Pana-Scan™ Portable Stand-Alone Combo Scanner! Scan pictures right from your Photo Albums, Magazines, Slides & Negatives.

The Pana-Scan™ Portable Stand-Alone Combo Scanner allows you to quickly and easily convert your cherished photos, while still in photo albums or magazines, to digital images using patented **anti-glare technology**. The Pana-Scan™ Portable Stand-Alone Combo Scanner also converts **loose pictures** up to 4X6 inches plus **slides and negatives** into **14 megapixel digital images** without the need to be connected to a computer. You can showcase all of your precious images and memories on a **TV (TV must have a compatible USB input)**, or **email, share on social media, print and archive**.

To scan a picture while in a **photo album** or **magazine**, just place the scanner on top of the desired image and when you see the image on the **2.4" LCD screen**, press the copy button. The images are then stored on an **SD memory card** ready for you to use in your computer, view on your TV, share on social media, email or archive.

Pana-Vue® Archival Pages

Archival quality • Acid-Free • No PVC
Safe for long term storage
Designed for 3-ring binders
and hanging files
View, organize, and preserve your
negatives, slides, and prints
Protect from fingerprints,
scratches, and dust

Pana-Vue Archival Pages are made in the USA to the same exacting standards that made Pana-Vue Slide Viewers world famous. They help photographers view, organize, preserve and protect their negatives, slides and prints.

Pana-Vue Archival Pages benefit from the **excellent brand recognition of Pana-Vue**, known by photographers for more than half a century.

Pana-Vue Archival Pages packaging has the same exciting, appealing look of the world famous Pana-Vue slide viewers. Packages are color-coded for quick identification.

Pana-Vue Archival Print Pages are clearly marked as **"Safe for Photographic and Digital Prints"**.

Pana-Vue Archival Slide Pages are **all 6 mil extra heavy weight polypropylene**.

How to Order:

Each Argraph Item# is one pack. i.e., EPA409 = 1 pack of 25 pages 35-6x4, EPA410 = 1 pack of 100 pages 35-6x4. Case quantities are listed for more efficient ordering. When ordering cases, order by number of packs: i.e., to order a case of 35-6x4 order 50 packs of EPA409.

MARUMI

Marumi is pleased to announce the launch of high density ND filters Super DHG ND 500 (2.7) & ND 1000 (3.0). Like the current DHG ND series, the neutral color balance maintains the original color of the images. In addition, our Super DHGND 500 (2.7) & ND 1000 (3.0) filters have a Water and Oil Repellent Coating to allow trouble-free shooting near water.

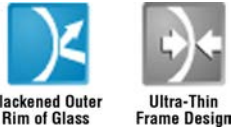

ND500 (2.7) reduces light amount to 1/500 which is equivalent to 9 stops,
ND 1000 (3.0) reduces light amount to 1/1000 which is equivalent to 10 stops.

The high density ND filters enable creative photographers who want to capture long exposure daytime images.

Super DHG ND500 & ND1000 Filters

MARUMI EXUS

The new EXUS SERIES – the flagship of Marumi digital camera filters features exceptional performance and functions that are ready to meet and exceed the demands of the latest digital SLR cameras.

EXUS
 ↓ ↓ ↓
 Experience Ultimate Superior
 Excellence Ultra Specifications

EXUS INNOVATIONS

UNIQUE NEW EXUS MULTI-LAYER COATING

- **ANTI-STATIC COATING**
- Keeps dust away from lens
- **WATER & OIL REPELLENT**
- Water and Oil spots can be easily wiped away
- **ANTI-REFLECTION**
- For maximum transmission

NEW SLIM ULTRA-LOW REFLECTION FRAME

- **LIGHT-SHIELDING GROOVES**
- **SATIN FINISH**
- **KNURLS ON THE RING**

EXUS LENS PROTECT

- **ULTRA LOW REFLECTION**
- Less than 0.3%
- Blackened rim of lens minimizes internal reflections
- **FLATNESS AND STRENGTH**
- The EXUS Lens Protect filter glass assures improved flatness and strength while maintaining Marumi's exceptionally thin frame design

EXUS CIRCULAR POLARIZER

- **ULTRA LOW REFLECTION**
- Less than 0.6%
- Blackened rim of lens minimizes internal reflections
- **HIGH TRANSMISSION POLARIZER**
- Transmission Rate 30% higher than conventional polarizers
- **TEFLON COATED MALE THREADS**
- For smooth attaching and detaching on camera

EXUS UV L390

- **REPLICATES THE HUMAN EYE**
- Blocks ultraviolet rays of wavelength 390nm and under to produce a clear image of distant views, replicating what the human eye sees.
- **ULTRA LOW REFLECTION**
- Less than 0.3%
- Blackened rim of lens minimizes internal reflections
- **FLATNESS AND STRENGTH**
- The EXUS Lens Protect filter glass assures improved flatness and strength while maintaining Marumi's exceptionally thin frame design

MARUMI Super DHG Filters

Priced to be your
most Profitable
Digital Camera
Accessory!

The First Filters designed specifically for digital cameras and lenses

Featuring the Digital Super Coating that gives you:

- **Hard Protection** - Even with "heavy duty use" it guards the filter's surface from scratches.
 - **Water & Oil Repellent** - Just wipe off any water or oil spots.
 - **Antifouling** - Keeps the lens surface free of dust and dirt.
- Plus the features of Marumi's renowned DHG Filters:
- Proprietary ultra-low reflection coating increases light transmission.
 - Lens' outer rim is blackened to minimize internal reflection.
 - Satin smooth, ultra thin, matte-black metal filter frame further minimizes reflection.

MARUMI DHG Filters (Digital High Grade)

Priced to be your most Profitable Digital Camera Accessory!

The First Filters designed specifically for digital cameras and lenses

Digital Cameras Need Special Filters

Marumi DHG Filters eliminate the flare and ghosting prevalent when the CCD or CMOS chips in digital cameras convert light into electrical signals.

UV -L390 Filters

Block UV rays with wavelength of 390nm or less. Produce natural, clear images with sharp contrast without affecting the visible light. Available in both **DHG**, and **SUPER DHG** versions.

- Marumi's Proprietary ultra-low reflection coating increases light transmission.

- Outer rim of lens is blackened to minimize internal reflection.

- Satin smooth, ultra thin, matte-black metal filter frame further minimizes reflection.

MARUMI

FIT+SLIM

Marumi's new FIT + SLIM digital camera filters feature exceptional performance and functions that meet and exceed the demands of the latest digital SLR cameras, all within a new, slimmer profile.

FIT+SLIM Innovations®

- Multi Coating Glass and Satin Finished Frame for low reflections

- Light-Weight
 - MC Lens Protect: Approx. 11g
 - Circular PL: Approx. 20g

- Ultra-Slim Frame & Lens Cap Attachable

Achieves both slim frame and the capability of lens cap attachment by adopting newly developed high pressure mounting method.

- Eco-friendly Filters Made From Lead-Free Materials (L390)

FIT + SLIM LENS PROTECT

- Protects lens from dust & scratches
- Multi Coating
- Ultra Slim Frame
- Lens Cap Attachable

FIT + SLIM UV CUT L390

- Cuts UV Rays
- Protects lens from dust & scratches
- Multi Coating
- Ultra Slim Frame
- Lens Cap Attachable

FIT + SLIM CIRCULAR POLARIZER

- Increases color saturation
- Reduces reflections
- Ultra Slim Frame
- Lens Cap Attachable

DHG Achromat Macro Lens

This breakthrough technology developed by Marumi makes DHG Achromat filters ideal for macro photography. Achromat Macro filters are designed to shorten the focal length of your lens and to enhance its macro mode capabilities with outstanding clarity. Other filters can provide simple magnification. Only Marumi Digital High Grade (DHG) Achromat Macro filters provide the edge-to-edge sharpness, detail, and clarity that professionals demand.

Marumi Digital High Grade (DHG) Achromat Macro Lenses are available in 2 magnifications: 330 (+3) and 200 (+5). Both produce outstanding edge-to-edge clarity that is unsurpassed by any other filter product. When ordering use AMD before size code. ie: AMD + AC349, AC352, AC549, etc.

| Size | Argraph Code | MSRP | MAP | Single Net |

FLOTONE allows the photographer to achieve, in just seconds, beautiful effects that would take hours with lights and single-tone backgrounds. Each FLOTONE sheet is individually hand-made to achieve a silky matte, non-glare surface. The synthetic PVC material and colors do not absorb water, so they can be used with ice cubes, fruit, flowers, etc. They can be cleaned with a mild soap solution and soft cloth, making FLOTONE reusable.

FLOTONE graduated background is a beautiful synthetic PVC material for professional photographers, art directors, graphic designers, etc. These smoothly graduated backgrounds afford interesting lighting effects without losing valuable time setting up and doing trial shots.

QPCARD

THE KEY TO COLOR

The easiest, most cost-effective aid for balancing digital images

Even with correctly set and calibrated computers, software and monitors, you must balance a digital image against the monitor. A guaranteed neutral gray surface in the image simplifies balancing. It is complicated to carry around a cumbersome grey card and position at a suitable place in the subject. In addition, the grey card becomes thumbbed, dirty and faded from the light, so that after a while it is no longer neutral grey.

QPcard solves these problems. It comes in a pack of 3 cards in a protective bag that fits easily into camera case or pocket. The cards have adhesive on the back so that they can be attached to virtually any surface. The grey surface is completely neutral and reflects 18% light. A white and black patch can be used for contrast adjustment. In addition, the card can be used as a dimensional reference.

Quick Start Instructions

1. Place QPcard on the object and expose a reference image.
2. Expose the remaining images under the same light conditions without QPcard.
3. Use reference image for color balancing in Photoshop. Apply to all images taken in same light.

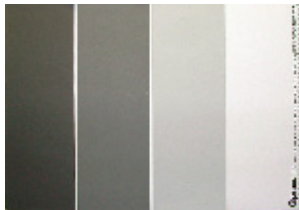

QPcard does not require any special software in the computer. It can be used with standard software such as Adobe Photoshop or with the photography software that comes with professional digital cameras. Most scanner software has a function for grey balancing that works together with QPcard.

QPCARD

THE KEY TO COLOR

4-Step Grey Scale Card

The QPcard 4-Step Grey Scale has been developed with the help of experienced users of the original QPcard 101. The QPcard 4-Step Grey Scale is much bigger, 9.6" x 6.7", than the original QPcard and made of thick cardboard. It has four fields, for better distribution along the grey scale. Furthermore it has replaced the black with a dark grey field. Black is difficult to adjust anyway, so four fields not too close to the end points of the tonal scale are much more effective. These four fields work exceptionally well with Adobe Photoshop's ability to correct the balance using four points under "Curves".

QPCARD

THE KEY TO COLOR

Qp Card 202 & FREE Qp Calibration Software for Raw Images

Getting accurate natural colors from any digital camera with RAW option has been an elusive goal for digital photographers. It can be a challenge to get photographs with correct hue; where red is red, green is green and blue is blue – and to make photographs with sufficient saturation in all channels. Believing that this is the optimum starting point for efficient picture editing in RGB, QP has been at the forefront of addressing this challenge. QP's second goal is to get the correct colors in a fast, accurate, uncomplicated, and inexpensive way.

QP has addressed these goals with the new QPcard 202 and QPcalibrator software, which perform color correction using color management and profiling at the first accessible stage in the digital image workflow – the RAW image. In order to accurately monitor each camera's color property, QP has designed a new high quality, color target with modern camera sensors in mind. With only 35 carefully selected and individually manufactured color patches, QPcard 202 can meticulously pin-point color behavior of almost any camera in any light.

QPcalibrator software compares camera performance with the target colors and creates instructions for the profile on how to "move" small segments of colors (almost 1300) into correct position in a three dimensional color space. Color saturation is controlled in two stages: primary control in the matrix, followed by "soft clipping" in the lookup table. It keeps track of color saturation making sure no color channel is over-saturated with blocked or "flat" colors as a result.

QPCARD

THE KEY TO COLOR

Qp Card 203 & FREE Qp Calibration Software for Raw Images

The **QPcard 203**, in conjunction with the free program **QPcalibration**, takes picture color control one step further. You now have real color management of (almost) any camera in (almost) any light. Take a picture of **QPcard 203** with the camera set in the raw mode. Open the picture in the free QPcalibration software. Generate a profile by clicking "Calculate", give it a name and "Save".

The profile will automatically be saved in the correct folder and can immediately be used in Adobe Camera Raw. Open Adobe Photoshop or Lightroom. The new profile will appear in the "Camera Calibration" option. Apply the profile to pictures taken with the same camera in similar lighting conditions. Generate more profiles for other cameras and lights. Daylight, tungsten, fluorescent, flash, halogen, LED, etc. A custom camera and light profile can be created in less than 10 seconds. The **QPcard 203** makes all your cameras interpret colors correctly in any light. **QPcard 203** is small enough to fit in a shirt pocket and sturdy enough to be left in a camera bag. When closed it is 3 3/4" x 5 1/4".

QPcard 203 has a neutral 18% gray card on the left side and a color card with 35 swatches on the right. The gray card is perfect for custom white balance setting on location or for grey balancing in Adobe Camera Raw.

The **QPcard 203** is very convenient to take on location, and extremely versatile, and the color swatches are less sensitive to reflections than other color charts.

FUJIFILM GFX-SERIES

GFX-50S

The FUJIFILM GFX 50S medium format mirrorless digital camera adopts a 43.8x 32.9mm medium format (FUJIFILM G Format) sensor with 51.4 MP. Featuring premium design and excellent operability stemming from the highly reputable digital camera X Series system and the accumulation of image design technology from over 80 years of experience, the GFX 50S achieves the highest ever image quality from Fujifilm.

Released with the APS-C sensor in 2011, the X Series has earned high praise from professional photographers and photography enthusiasts alike, due to its excellent image quality and mobility across a wide range of genres including landscapes, snaps, portraits, and sports photos. On the other hand, there were also many photographers craving for the release of a camera equipped with a large-size sensor with an even higher number of effective pixels, which could be used mainly in the fields of commercial and studio portrait photography, while at the same time keeping the excellent color reproduction of the X Series intact. In response to those voices, Fujifilm developed the FUJIFILM GFX 50S and the FUJINON GF Lenses series as a system for photographers that require even higher image quality than can be covered by the current X-Series lineup.

- Equipped with a 43.8mm x 32.9mm, 51.4 MP CMOS sensor, boasting approx. 1.7x the area of full frame sensors
- Equipped with X Processor Pro image processing engine
- 3.69M-dot organic EL electronic viewfinder & 2.36M-dot touchscreen LCD back panel
- Compact & lightweight body with high rigidity due to the adoption of magnesium alloy
- Newly developed large diameter G Mount with excellent robustness and durability
- Newly developed ultra-high resolution FUJINON GF Lenses

FUJIFILM X-SERIES

XF10

A premium compact digital camera with a high quality FUJINON 18.5mmF2.8 fixed lens. Weighing only 280g, the XF10 combines simple touchscreen operation with superior image quality and versatile settings in a pocket-sized body, making it the perfect companion for photo enthusiasts and smartphone users alike. The XF10 has wide dynamic range and produces sharp, high resolution images. Combined with Fujifilm's proprietary color reproduction technology, its 24.2 megapixel APS-C sized sensor allows the XF10 to produce high quality images in a wide range of settings. In addition, both 4K movie and Full HD high speed video are available on the XF10.

NEW

The first X Series camera to offer the new "SQUARE MODE," which allows users to switch to a 1:1 format with a single flick of the touchscreen, the XF10 is built for on-the-go usability. In addition, the XF10 offers 11 unique FUJIFILM Film Simulations and 19 Advanced Filters, providing photographers with the ability to enhance their creativity. The camera introduces two new Advanced Filters – "Rich & Fine" and "Monochrome [NIR]" – to easily add artistic flair or film-like color tones to photos.

X-H1

The X-H1 is the highest performing camera in the X Series lineup, with a newly-designed robust and durable body. The X-H1 incorporates a range of useful features that support shooting in various scenarios by professional photographers, videographers and experienced amateur photographers. These features include not only the first-ever X Series camera with 5-axis in-body image stabilization, which has a maximum of 5.5 stops, but also a flicker reduction mode which enhances the quality of indoor sports photography.

The X-H1 is compatible with a range of other removable lenses including the MKX18-55mmT2.9 and MKX50-135mmT2.9 professional cinema lenses. In combination, the new camera and lens combinations fulfill the professional still image and video production requirements in all genres, including sports photography.

- X-Trans CMOS III Sensor and X-Processor Pro Processor
- 5.5-Stops In-Body Image Stabilization
- Robust Weather-Resistant Body and Easy Operability
- Comprehensive Range of Video Features for Movie Production
- Flicker Reduction Mode and Improved AF Algorithms

FUJIFILM X-SERIES

X-Pro2

The FUJIFILM X-Pro2 is the new flagship range-finder style camera in the award-winning X-Series line. The X-Pro2 is the pinnacle of X-Series photography, and gives professional photographers an innovative, Advanced Hybrid Multi Viewfinder capable of quickly switching between optical and electronic finders, a new 24.3MP X-Trans CMOS III sensor for truly remarkable image resolution, and a new X-Processor Pro that delivers dramatically quick response times for unmatched overall performance.

- World's first Advanced Hybrid Multi Viewfinder with 2.36 million dots and maximum speed of 85 frames per second
- 24.3MP APS-C X-Trans CMOS III Sensor
- Dust and splash-resistant body with more than 61 points of weather sealing and freeze resistance to 14°F
- High-precision 3" rear display with 1.62 million dots
- Dual memory card slots (Slot 1 compatible with UHS-II Standards)
- Maximum ISO performance up to 12800 sensitivity; Extended ISO ISO100, 25600, 51200
- Innovative electric charge transfer rate for ultra-fast readout speeds
- Full HD video 1080p at 60fps
- Advanced creative filters

X-T100

Sporting a sleek and stylish design, the mirrorless X-T100 offers a host of features including a high magnification electronic viewfinder, a horizontal tilting rear LCD screen, the latest built-in Bluetooth technology for easy and seamless image transfer and an extended battery life, with up to 430 frames possible per charge. In addition, the X-T100 weighs just 448g with anodized coating on aluminum top cover, delivering a simultaneously retro and luxury feel. The X-T100 boasts a powerful 24.2 megapixel APS-C size sensor and is equipped with a phase detection autofocus system featuring a newly developed autofocus algorithm for super-fast and precise focusing. Combined with Fujifilm's renowned outstanding image quality with the company's proprietary color reproduction technology, the X-T100 is stylish, portable, and highly versatile - making it the ideal companion for everyday photography.

- Beautifully designed body offered in Black, Dark Silver, or Champagne Gold features anodized coating equipped with color reproduction technology that has been refined over 80 years. Dark Silver and Champagne Gold are two exciting colors brand new to the FUJIFILM X Series lineup, seen for the first time in the X-T100
- Featuring super-fast autofocus and a variety of automatic functions, including an evolved SR+ Auto Mode which is capable of subject recognition together with conventional scene recognition, the X-T100 ensures moments are captured quickly and accurately
- Compatible with existing XF/XC lens lineup of 26 FUJINON high quality lenses which cover focal lengths from 15mm to 1200mm (35mm equivalent)
- Features three-way tilting LCD monitor with a high resolution and high magnification (0.62x) electronic viewfinder, along with a powerful battery capable of 430 frames per charge
- Bluetooth low energy technology allows for quick and seamless image transfer
- Artistic expressions are made easy with the X-T100 with Film Simulation and Advanced Filter modes

FUJIFILM X-SERIES

X-E3

The X-E3 features APS-C 24.3 megapixel X-Trans CMOS III sensor and the X-Processor Pro high-speed image processing engine. The X-E3 is the first X Series model to feature Bluetooth technology. You can pair the camera with your smartphone or tablet device for easy transfer of pictures taken using minimal power. An all-new “Touch Function” feature is available on the X-E3, which enables gesture control like flick and pinch zoom. The AF algorithm optimizes the camera’s performance with tracking moving subjects. The X-E3’s premium exterior design, agility and functional beauty make it a mirrorless camera that is both a pleasure to own and fun to shoot with.

- Lightweight Body
- Outstanding Image Quality & High Speed Response
- Bluetooth® Wireless Communication
- Touchscreen
- High Resolution and High Definition 4K Video Recording

X-100F

The FUJIFILM X100F is the latest premium compact digital camera to join the X Series family. It is the ultimate in premium compact digital camera, equipped with the Advanced Hybrid Viewfinder of enhanced convenience. While maintaining the elegant design and a popular 23mmF2 focal length, the new camera has been developed in pursuit of easy operability, addressing the requests of users of previous X Series models.

- 24.3MP X-Trans™ CMOS III, an APS-C sensor with no low-pass filter
- X-Processor Pro high-speed image processing engine
- Enhanced response performance and improved AF performance from previous X100 models, with six AF modes to be selected
 - o The number of focusing points has been expanded from 49 in previous models to 91 (up to 325 points). Approx. 40% of the imaging area (center area containing 49 focusing points) is covered with phase detection AF pixels to form a fast and precise phase detection AF area that can be used in a variety of scenes.
- Evolution of the Advanced Hybrid Viewfinder
 - o You can now change the magnification of the electronic rangefinder, shown in a small window as EVF at the bottom right corner of the optical viewfinder, for acute accuracy. The Real Time Parallax Correction function is applied to the focus area in addition to the guide frame to enable assured framing and focusing in the Manual Focus mode.
- Intuitive and practical operability
 - o New features in the X100F include the Built-In ISO Dial, incorporated into the Shutter Speed Dial, the Focus Lever, and the “C” position for enabling ±5 stop exposure compensation. Most of the buttons and dials are concentrated on the right-hand side to enable single-handed operation.

FUJIFILM X-SERIES

X-T2

The FUJIFILM X-T2 is the ultimate mirrorless digital camera. The X-T2 is a splash-resistant premium interchangeable lens camera with a large OLED electronic viewfinder (EVF). The X-T2 houses the latest generation 24.3MP X-Trans CMOS III with an APS-C sensor with no low-pass filter, boasting the highest performance in the history of X Series. The new X-T2 produces crisp image resolution comparable to that of cameras equipped with larger sensors and higher pixel counts, all in a more compact and classically-designed body.

- 24.3MP X-Trans CMOS III Sensor
- Dust and moisture-resistant body with approximately 63 points of weather sealing; Freeze resistance to 14°F
- X-Processor Pro
- High-precision 0.48-inch, 2.36 million dot OLED viewfinder
- Full 4K 3840x2160 30P/25P/24P shooting (Using a card with the UHS Speed Class 3 or higher)
- Four different display modes: Full, Normal, Dual and Vertical
- Tempered glass 1.04 million dot high-precision 3" tilting LCD monitor with three-directional tilt
- Digital Split Image and Focus Highlight Peaking
- Wi-Fi and remote camera operation
- ISO200 - 6400, extended ISO 100, 12800, 25600, Auto(maximum ISO setting from ISO 400 – ISO6400 available) with High ISO 51200 setting
- Lens Modulation Optimizer technology maximizes each lens' performance
- In-camera RAW converter
- Die-cast magnesium body provides a sturdy and durable, while compact and lightweight design
- Two command dials and six Function buttons for instant control and customization
- Interval timer shooting for Time Lapse photography is available with intervals of 1 second to 24 hours and up to 999 frames
- Advanced filters and Film Simulations, including ACROS

X-T20

The compact and lightweight FUJIFILM X-T20 comes with an updated sensor and processor, a reworked AF algorithm, and a tilting touchscreen LCD monitor. The X-T20 also has exciting video functionality and is capable of capturing 4K movies with Fujifilm's popular Film Simulation modes.

- 24.3MP X-Trans™ CMOS III, an APS-C sensor with no low-pass filter
- X-Processor Pro high-speed image processing engine
- 5.0fps live-view shooting, start-up time of 0.4sec., shutter time lag of 0.050sec. and shooting interval of 0.25sec.
- Easy operability for still photography
 - o Tilting touchscreen panel for operation at almost any angle
 - o Auto mode selector for fully-automatic Advanced SR Auto mode
 - o Exposure Compensation Dial has C position for exposure compensation up to ±5 stops
- AF-C Custom Settings for moving subjects
 - o Features AF-C Custom Settings where you can choose from five AF-C presets according to the way your chosen subject is moving. The AF algorithm has been revised for improved accuracy, resulting in a dramatic improvement when tracking a moving subject in the AF-C mode.
- Strong Video features
 - o The X-T20 adds a Video option to the Drive Dial and can produce Full HD and 4K video using the X Series' famous Film Simulation effects (including ACROS). You can output recorded video to an external monitor via the HDMI port and input audio from an external microphone.

FUJIFILM Binoculars

Techno-Stabi™

Key Features

- FUJINON'S unique EBC coating allows a great deal of light to pass through the binocular. Great for low light performance.
- ±5° (14x40 model) and ±3° (12x32 model) of vertical stabilization allows you to use it on land, sea, or air.
- Designed with water and fog proof seals (Nitrogen Purged). O ring sealed.
- Rubber armored body allows user to have a firm grip.
- Comes with a flotation strap for use on or around the water.
- Phase-coated prisms give a sharp, high contrast image.
- Automatic shut-off feature to help improve battery life.
- Comes with a mil spec hard case for secure storage when not in use (14x40 model only).
- Techno-Stabi binoculars feature Fujifilm's 1 Year Limited Warranty. The warranty does not cover accessories, battery case and rubber.

Mariner WPC XL

Key Features

- Fully multi-coated optics ensures maximum light transmission.
- Cost effective to fit any budget.
- Designed with waterproof seals – O ring sealed. And they float when used with provided flotation strap.
- Both models offer long eye relief (18mm) and provide non-vignetting images. Great for people that wear eyeglasses.
- Polycarbonate housing make it light weight (under 2lbs).
- World Compass is equipped with an LED light which allows you to see the compass even under low light conditions.
- Mariner series binoculars feature Fujifilm's 1 Year Limited Warranty. The warranty does not cover accessories or rubber.

Polaris FMTRC-SX

Key Features

- FUJINON'S unique EBC coating allows 95% of light to pass through the binocular Great for low light performance.
- Field flattener lens provides sharp images from edge to edge with no distortion.
- Designed with waterproof and fogproof seals (Nitrogen Purged). O ring sealed.
- Rubber armored body allows user to have a firm grip, even with one hand.
- Long eye relief (23mm) is great for those who wear glasses (7x50 & 10x70 models only).
- 7x50 FMTRC-SX model is equipped with a worldwide compass.
- Mil spec shock and impact resistant body construction.
- Polaris binoculars come with Fujifilm's Limited Lifetime Warranty. The warranty does not cover accessories or rubber.

KF 8x42 H

Key Features

- Small compact roof prism body structure allows for easy carrying and transporting.
- Fully multi-coated optics ensures maximum light transmission (applies to 42mm & 32mm models only).
- Phase correction coated prisms enhance resolution and contrast (applies to 32mm & 42mm models only).
- Precise center focus feature makes it possible to bring details into sharp focus with just a movement of the finger.
- Impact resistant high-quality aluminum housing.
- Designed with waterproof seals – O ring sealed.
- KF series binoculars feature Fujifilm's Limited Lifetime Warranty. The warranty does not cover accessories or rubber.

mini 9

FUJIFILM instax

These cameras have filled a need for fun and originality with immediate results that can be shared instantly with anyone, anywhere, anytime! And the fun and excitement continues... The new INSTAX Mini 9 cameras will have the same body as the current Mini 8 model, but will have a selfie mirror (similar to the Mini 25 and Mini 70) and will come with a Macro lens attachment.

WIDE 300

ISO 800 Instax wide color film in convenient 20-packs.

Wide format photography is fun when people get together! This large film is well suited to photography at parties and other gatherings. Everybody's facial expressions are clearly shown. The instax WIDE 300 is lightweight, inexpensive, fun to use, and produces delightfully retro images that you simply can't get from anything else!

SQUARE SQ 6

Square Film WW1 - 10 Exposures

Since Square film was well accepted in the market with the launch of the INSTAX SQUARE SQ10, the INSTAX SQUARE SQ6 was developed. The INSTAX SQUARE SQ6 is the first analog instant camera within the INSTAX SQUARE lineup. It is the perfect tool for users who want to be creative and use instant photos to express themselves and their everyday moments on a square film format.

SQUARE SQ 20

Square Film WW1 - 10 Exposures

NEW!

As a hybrid instant camera, equipped with a digital image sensor and digital image processing technology, the SQ20 offers users the ability to select their favorite images to print. Users can even edit and apply various filters. Using the 1:1 aspect ratio, INSTAX SQUARE film allows for more capture of the scene in a single photo, delivering exceptional image quality with numerous artistic expressions. For the first time in INSTAX instant photography, the SQ20 introduces the motion mode. Utilizing a dial on the back of the camera, users can take a video of up to 15 seconds and choose the best moment of a moving subject to print, which can often times be difficult to capture.

Share Printer 2

The new instax SHARE SP-2 that lets you print out your best smartphone pictures faster than ever in high quality credit-card sized prints. Following an incredible response from customers, Fujifilm continues to expand the INSTAX product line to give users even more ways to get creative with their instant pictures that can be shared quickly in-person and online with #myinstax. This next generation instax SHARE SP-2 features a sleek body, crisp image quality, improved WiFi connectivity and a refined operation, all in two new body colors – Silver and Gold – with added texture for classic good looks. The new SHARE SP-2 improves its speed over the original Share SP-1 by printing smoothly and quietly in just 10 seconds compared to 16 seconds in the previous model.

Share Printer 3

Adding to our line of square format devices, the new SP-3 has the ability to print photos quickly from smartphones, easily and in high quality as previous models (such as the SP-2), but can now, instead, print on INSTAX SQUARE Film, the hugely popular new square format that was added to the INSTAX film range this past May. With a 1:1 aspect ratio, the structure of square photos is an effective artistic style. A long-standing favorite among photography lovers, it is now also popular among smartphone users and is the standard format on social media such as Instagram. Recent years have seen a rise in the sharing of square photos on social media, with users putting great care into every step from composition to editing and processing. With the SP-3, users can now print out those special photos as a gift or to decorate their room.

INSTAGRIP sling strap

Instagrip Sling Strap gives you quick access to your camera for almost instantaneous shooting with comfortable padding on the shoulder in a sling position.

Your camera is attached utilizing the tripod screw at the base of the camera body and is secured using the rotating aluminum knob. Once attached, the camera hangs securely at your side, ready to be raised instantly to shoot up position.

Adjustable straps and swivel buckle makes the strap suitable for most body types. Detachable dual lock buckle enables the camera to be attached and detached from the main sling strap easily.

| Item # | Description | List | Net | Intro PROMO 5+ |

Camera Grip & Stand

BSA973

Unique and Innovative! Leather hand grip holds camera snugly in the palm of your hand for quick shooting!

Use as a grip, or a camera stand, and also allows you to put your camera on a tripod without taking the base plate off the camera! Camera stand folds neatly out of the way against the camera base when not in use. A shoulder strap can also be attached to the other side of the camera (like Camera Strap Buddy) to allow you to carry your camera vertically against your body.

3-Point attachment wraps around thumb for extra security

Camera Strap Buddy

Reduce unwanted camera swing and bounce. The Camera Strap Buddy attaches to one end of your camera strap, and screws into tripod mounting hole on the base of the camera. The other end of the strap attaches to a camera strap lug. The Strap Buddy changes the camera's direction so the lens will point downward. This orientation keeps the camera flat against your side, both for comfort and reduces camera swings and bounces.

STANDARD PACKAGING: Blister Package 5" x 7" x 1/2" PRODUCT SIZE: 1.4" X 1 X 1/2"

USB/FireWire HDMI Cables

HDMI Cables

Connects any HDTV, receivers to HD camcorders with HDMI. It is FullHD HDMI 1.3 compliant supporting 480p/720p/1080i/1080p & 24/48/50/60Hz. This cable is for HD camcorders that uses the new mini-HDMI connector. It supports high-bandwidth, uncompressed video and multi-channel digital audio, has double shielding for maximum video performance, prevents signal loss & screen ghosting. (Connectors: HDMI Male to Mini-HDMI Male).

Sto-Fen Products

OMNI-BOUNCE:

The Omni-Bounce creates a Diffused Bare Bulb Effect. Giving even coverage across the entire frame, with lenses from 15mm to 200mm in the 35mm format. (And equal in other formats as well.)

The Omni-Bounce is easy to use and goes onto and off of your flash in seconds with custom fitting, except UNI, and No Velcro.

Designed for years of service with out the bulk of some other Diffusers, it is small enough to fit easily into your gadget bag or pocket.

TWO-WAY BOUNCE:

The Two-Way Bounce is a pocket size Bounce Card that gives you the advantage of bouncing without the need of a ceiling. The unit is small enough to fit into a shirt pocket and yet delivers a big punch of light.

The package also includes a mini Panel that provides a kicker light for fill lighting use.

All units, except UNI, are custom mounted with adapter provided and require No Velcro. Adapters can be reversed for shoot thru panel lighting as well.

88015 GREAT SMOKY MOUNTAIN

The Most Comfortable Photo-Backpack ever created and... it's pretty clever too!

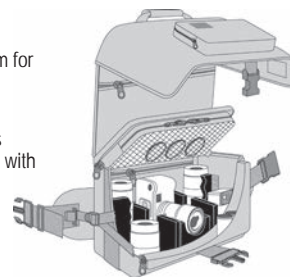

Backpack Technology: Aluminum frame for extra support and comfort. Well padded adjustable shoulder straps, complemented by an extremely comfortable neoprene waist-belt with compression straps and quick release buckle.

Work Surface: The top section pulls away from the bottom section in reverse fashion, creating a useful, flat work surface, with water resistant material.

Top Hiking Section: 7"H x 10"W x 6 3/4"D. Plenty of room for hiking gear. Removable pocket and a mesh pocket.

Bottom Photo Section: 8"H x 10"W x 7 1/2"D. One lens cradle and 5 adjustable dividers provide room for one SLR body with a lens attached, plus an additional 4 to 5 photo accessories.

Unique Tripod Carrying System: Slide tripod through loop below backpack. Pull draw-string cords on both sides to secure tripod.

Item# BMR88015

Created by one of Colorado's best backpack designers first, with M-ROCK's unique camera bag features implemented second, resulting in the most comfortable and functional backpack in the photographic industry!

Specialty Frames

Foldable Frame Series

A unique concept. The double frames can be mailed or travel in a purse or suitcase because an invisible hinge allows the frames to fold flat. Perfect as an announcement, premium, or as a double frame. The 4 x 6 size also holds 3 1/2 x 5 prints. Order by piece/multiples of 12.

Saflin[®] Acrylic Frames

“The Best Quality at the Best Price”

What makes Saflin Acrylics Better?

- We use only top-quality, crystal-clear, smooth acrylic.
- Full back prevents picture curl.
- Fired edges create a smooth, clean, look & feel.
- Longer base prevents fall-down.

Choose from:

- Saflin-quality, full 2mm thick acrylic. It is superior to “standard issue” frames.
- Deluxe 3mm thick acrylic - the “ultimate” bent acrylic... thicker and heavier than even our 2mm frames. Individually polybagged • Promo priced when ordered in multiples of the box quantity per item#.

Saflin® Specialty Frames

All specialty acrylics incorporate the same high standards of our bent acrylic line: Crystal Clear Acrylic, Full Back and Fired Edges. Our unique, borderless designs display photographs in their truest colors and compliment precious memories.

Individually polybagged. Promo priced when ordered in multiples of the box quantity per item#.

Clip Frames

Box Frames

Clear display frames are 1 1/4" depth. This allows photo to stand freely. Frames can be hung vertically or horizontally.

Magnetic Photo Frames

Perfect for refrigerators, filing cabinets and other magnetic surfaces. Extra magnetic strips prevent frames from slipping.

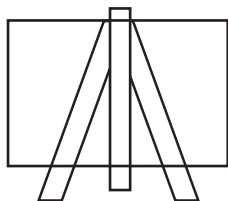

Key Chains

Great impulse item.

Triangular Pen/Pencil Holders

3mm acrylic. Display 3 vertical photographs. 3 photo sizes available: 2 1/2 x 3 1/2", 3 1/2 x 5" & 4 x 6".

Clear Easel Frames

Display your photos on our one-piece easel!

A sturdy screw holds the adjustable leg in place.

NEW!

ITOYA

ART PROFOLIO
BRAND

ProFolio Deluxe Photo Album:

Photo printing is back with a vengeance! Think about it — with your smartphone in your pocket or purse, you now take 100 times more photos than you probably did with your old point-and-shoot camera. And what are you going to do with all of those photos in your phone? Hopefully you'll join the increasing trend of printing 4"x6" prints again. So where are those prints going? In a shoebox? Definitely not! They're going into nicer photo albums than ever before. The Deluxe Photo Album is designed for today's photo printing world.

The ProFolio Deluxe Photo Album takes our best-selling photo storage albums and ups the ante with a beautiful, premium fabric wrapped around a hardcover outside. The ProFolio Deluxe Photo Album is available in three stylish colors: black, gray, and blue. The inside maintains our best-selling, acid-free, archival quality polypropylene pockets to protect your photos for years to come. Each album holds up to 240 4"x6" prints. The spine of each ProFolio Deluxe Photo Album has a customizable label holder so you can easily label all of your albums for easy storage or presentation. Each album also comes with a durable frosted sleeve to keep out the dust during storage and protect your album when moving it around. Perfect for coffee tables and showing off your photos to friends.

What are you waiting for? Go print some 4"x6" photos!

ProFolio Professional Presentation Book:

Introducing the ProFolio Professional art and photography presentation book. Designed by professionals for professionals who desire a presentation book that looks more, well... professional! We start with a premium black fabric and cover the hard cover outside using a book-binding method that results in perfectly bound edges and a super premium look and feel. The pockets of the ProFolio Professional are our exclusive, crystal-clear PolyGlass Pages that allow your art and photography to shine through. The pockets are riveted into place instead of using the traditional heat welding method, resulting in both strength and a premium look. Of course the pockets have acid-neutral black paper inserts that are archival safe. Each ProFolio Professional book has 24 pockets for 48 views. The ProFolio Professional also comes with a durable frosted sleeve to protect your book from dust during storage and protect it from the elements when transporting from location to location. Available in four art and photography sizes.

2" Neoprene Camera Straps

NEW Colors!

These Neoprene Straps are very soft and elastic, slip proof backing helps prevent the strap from falling off your shoulder.

The straps are extremely comfortable- the elasticity absorbs the weight of heavy cameras.

Pg.33

INSTAGRIP sling strap

Instagrip Sling Strap gives you quick access to your camera for almost instantaneous shooting with comfortable padding on the shoulder in a sling position.
