## DHG Filters (Digital High Grade)

The First Filters designed specifically for digital cameras and lenses

### Digital Cameras Need Special Filters

Marumi DHG Filters eliminate the flare and ghosting prevalent when the CCD or CMOS chips in digital cameras convert light into electrical signals.

- Marumi's Proprietary ultra-low reflection coating increases light transmission.

- Lens' outer rim is blackened to minimize internal reflection.

- Satin smooth, ultra thin, matte-black metal filter frame further minimizes reflection.

**Priced to be your most Profitable Digital Camera Accessory!**

## SUPER DHG LENS PROTECT CIRCULAR POLARIZER

### Featuring the Digital Super Coating that gives you:

- **Hard Protection** - Even with "heavy duty use" it guards the filter's surface from scratches
- **Water & Oil Repellent** - Just wipe off any water or oil spots
- **Antifouling** - Keeps the lens surface free of dust and dirt

### Plus the features of Marumi's renowned DHG Filters.

- Proprietary ultra-low reflection coating increases light transmission.
- Lens' outer rim is blackened to minimize internal reflection.
- Satin smooth, ultra thin, matte-black metal filter frame further minimizes reflection.

## DHG Achromat Macro Lens

This breakthrough technology developed by Marumi makes DHG Achromat filters ideal for macro photography. Achromat Macro filters are designed to shorten the focal length of your lens and to enhance its macro mode capabilities with outstanding clarity. Other filters can provide simple magnification. Only Marumi Digital High Grade (DHG) Achromat Macro filters provide the edge-to-edge sharpness, detail, and clarity that professionals demand.

Marumi Digital High Grade (DHG) Achromat Macro Lenses are available in 2 magnifications: 330(+3) and 200(+5). Both produce outstanding edge-to-edge clarity that is unsurpassed by any other filter product.

These lenses are manufactured to the highest standard and feature ultra low reflection coating. The Marumi (DHG) Achromat Macro lens is mounted in specially designed rings that feature a low reflection and satin like finish. They are specifically designed to be the thinnest possible, while maintaining strength and functionality. This allows for the widest possible focus length.
