

NEW! SIRUI VA SERIES ARCA COMPATIBLE PROFESSIONAL FLUID VIDEO HEAD

**Compact design • Professional Quality
Made for today's DSLR/Video Systems**

**VA
Series**

Arca Compatible Video Head

VA-5

To create beautiful, professional videos, you need smooth movements and transitions. SIRUI VA-5 Professional Fluid Video Heads have a fluid system designed to produce smooth pans and tilts. And an internal spring-assisted counter-balance mechanism provides added support, smoother tilt movements and protection to your equipment.

Forward/backward camera position adjustments for balance are fast and easy. And the dual safety lock system prevents the camera from falling off when the primary locking mechanism is loosened. Push the secondary release button to remove the camera from the video head.

The precision-machined aluminum VA-5 weighs only 1.3lb (.6kg) , it can easily handle camera systems (camera, lens, grip, lights, etc.) weighing up to 6.6lb (3kg)!

To make horizontal alignment of the head extra easy, there are 2 bubble levels - one on the base of the head to align the tripod and one on top of the video head to align the camera (a SIRUI first!).

The VA-5 is also perfect for use with spotting scopes for bird-watching . It includes a TY-70A Quick Release Plate and will accept most SIRUI TY-series Quick Release Plates (excluding TY-50X/ 60X/ 70X) and many other Arca-compatible quick release plates.

Features

- Precision machining and forged aircraft aluminum bodies provide rugged, reliable heads.
Weighs only 1.3lb (.6kg!) Supports up to 6.6 lb (3kg)
- Smooth fluid movements combined with an advanced balancing system
– 360° horizontally and +90/-70° vertically
- Two bubble levels for critical alignment

Additional Quick Release Plates

VA FLUID VIDEO HEAD

Item #	Sirui Model #	Materials	Height in (mm)	Weight lb (kg)	Load lb (kg)	MSRP	MAP	NET
