### WHY SIRUI BALLHEADS?

Each assembled component of SIRUI Ball Heads is produced by CAM (Computer Aided Manufacturing) - the ultimate in precision manufacturing techniques.

SIRUI ball heads are made of **aviation quality aluminum alloy** 7075-T6 and 6067-T6 for long life and maximum strength.

SIRUI uses a special manufacturing technique that produces the support ball with tolerances to within 0.01mm of a perfect sphere. This uncompromising precision guarantees **superior performance and smooth operation** for any type of 35mm DLSR or medium format camera system.

The interior locking system in SIRUI Ball Heads uses SIRUI designed **double bevel locks for outstanding locking performance and reliability**. Most ball heads only use a single, less efficient interior locking system.

The panning base is designed with a 360° dial. Having a **separate panning base lock knob** provides greater accuracy for panning and panoramic shooting.

The **patented safety lock design**, and SIRUI quick release plates, effectively prevent the camera from accidentally sliding off of the ball head. And most quick release plates can be used on SIRUI Ball Heads (Note: safety lock design not available from other brands).

The **custom anodized surface treatment** makes all metal surfaces highly resistant to abrasions and produces a beautiful appearance.

## K-X SERIES BALLHEAD

1. Separate control knobs for panning and locking. Friction knob is conveniently located on the main locking knob.
2. Triple bubble levels allow precise horizontal leveling for critical shooting situations.
3. Sirui's unique locking mechanism provides unequalled locking force even with loads up to 77lb (35kg)!

5 of the top 10 Ball Heads in Germany's 'Traumflieger Test of 33 Ball Heads' are Sirui Ball Heads

### G-X, C-X, K-X & L SERIES BALLHEADS

Item #	Sirui Model #	Ball Diameter	Base Diameter	Ht in (mm)	WGT lb (kg)	LOAD lb (kg)	MSRP

# What Makes Sirui Professional Ball Heads Your Best Choice?

## CAM Produced

Each assembled component of SIRUI Ball Heads is produced by CAM (Computer Aided Manufacturing) - the ultimate in precision manufacturing techniques.

## Aviation Grade Aluminum Alloy

SIRUI ball heads are made of aviation quality aluminum alloy 7075-T6 and 6067-T6 for long life and maximum strength.

## SIRUI Precision Manufacturing - 0.01mm tolerances!

SIRUI uses a special manufacturing technique that produces the support ball with tolerances to within 0.01mm of a perfect sphere. This uncompromising precision guarantees superior performance and smooth operation for any type of 35 mm, DSLR, medium or large format camera system.

## Sirui Designed Dual Bevel Ball Head Locks

The interior locking system in SIRUI Ball Heads uses SIRUI designed double bevel locks for superior locking performance and reliability. Most ball heads only use a single, less efficient interior locking system.

## Patented Safety Lock

The patented safety lock design, and SIRUI quick release plates, effectively prevent the camera from accidentally sliding off of the ball head. And most Arca-compatible quick release plates can be used on SIRUI Ball Heads. (Note: safety lock design not available from other brands).

## Custom Anodized Surface Treatment

All SIRUI products undergo a special anodized surface treatment that makes all metal surfaces highly resistant to wear and increases durability and weather resistance. Anodizing is an environmentally safe electro-chemical process. This also prepares the surface to provide better adhesion of colored finishes.

Sirui GX Series Ball Heads

Winner of Germany's Foto Magazin Tripod Quality Test - M3204

Winner of Camera Magazine Innovative Imaging Product of the Year - TX Series

5 of the Top 10 Ball Heads in Germany's "Traumflieger Test of 33 Ball Heads" are Sirui Ball Heads

## Panning base

The panning base is designed with a 360 degree dial. Having a separate panning base lock knob provides greater accuracy for panning and panoramic shooting.

## High Quality Quick Release Plates

All SIRUI TY Series Quick Release Plates are made from forged aluminum alloy. The forging technique produces high-density metals with much greater strength than die-cast methods.

## Model Specific Quick Release Plates

When using long lenses or heavy cameras, it is very important to make sure that there is a perfect fit between the camera and quick release plate. For that reason, SIRUI offers a selection of quick release plates for specific

**Sirui 6 Year Warranty**  
Sirui backs up its products with a 6 Year Warranty!

The red anti-twist stoppers are designed to prevent the camera from shifting or twisting as you move the ball head. And the Special QR Plates are model specific for a perfect fit.

Conveniently hand tighten or use the included allen wrench to secure your camera/lens onto the Quick Release Plate

TY Series QR plates are designed with slide-stopping rubber mats to prevent the camera/lens from moving while tightening the screw.

Comes with protective storage case

## Separate adjustment knobs

Separate adjustment knobs for panning, friction control and locking, provide maximum control and flexibility.

## GX Series Ball Heads

1. Separate control knobs for panning, locking and friction control.
2. Dual built-in bubble-levels help make horizontal & vertical alignment fast & easy.

3. Sirui's unique locking mechanism provides unequalled locking force even with loads up to 44lb (20kg)!

## KX Series Ball Heads

1. Separate control knobs for panning and locking. Friction knob is conveniently located on the main locking knob.
2. Triple-bubble levels allow precise horizontal leveling for critical shooting solutions.

3. Sirui's unique locking mechanism provides unequalled locking force even with loads up to 77lb (35kg)!
