SIRUI MX SERIES PROFESSIONAL TRIPODS

**MX
Series**

**Our tallest, heavy-duty tripods are
lightweight and fold compactly**

The M Series tripod is one of our tallest tripods. When you need a heavy-duty model, but still want it to be compact, nothing comes close to the M Series. Take the M-3204X - it extends to an impressive 69.3 in. (176 cm), yet folds down to only 20 in. (51cm)!

Weighing only 5.1 lbs (2.3 kg) in Aluminum and 4.2 lbs (1.9 kg) in 8-layer 100% Carbon Fiber, this amazing tripod has a load rating of 39.6 lbs (18kg) and will easily fit in an airline carry-on!

The M Series tripod has a uniquely designed leg mechanism that allows you to move the legs up to 180°. This allows the tripod to be folded significantly smaller than comparably sized tripods with conventional leg designs. Simply depress the leg angle lock and invert the legs 180°. An added advantage is that you can keep a ball head on the tripod and it will still fit in the included tripod case. Another advantage is that, like the N-series, the M-series can be converted into a monopod.

The new split center column makes changing from the standard center column to the short center column fast & easy! By unscrewing the hanging hook from the bottom of the center column, the column separates and the short center column remains on the tripod, ready to go. No need to remove the full-sized center column and replace it with the short center column. In addition to being a rugged tripod, it has the ability to be converted into a high-capacity monopod! This is really convenient when tripods are not allowed or when you're shooting in tight spaces. By attaching the larger portion of the split center column to the **M-X series** you can increase the height of the monopod.

M-3004X
Recommended Ball Heads:
K-30X, K-40X

M-3204X
Recommended Ball Heads:
K-30X, K-40X

Features

1. Tripod converts to monopod; center column can be attached for even more height.
2. Legs fold up 180° for extra compactness
3. The center column can be inverted for unusual low angle shots
4. For speed and convenience, each leg has an automatic leg angle lock mechanism
5. Short section of split center column allows for low angle or macro shooting
6. Three position leg angle for uneven terrain
7. Your choice of economical aluminum or lightweight carbon fiber
8. Retractable spiked feet for outdoor photography

What's included:

Split center column, custom case, padded shoulder strap, wrist strap, extra reversible mounting screw, mounting platform, tools, instruction manual, warranty card
