

SIRUI G-X, C-X, K-X & L SERIES PROFESSIONAL BALL HEADS

HEADS

Superior performance at an unbeatable price.

G-X SERIES BALLHEAD

G-10X Ball Head

- Separate adjustment knobs for panning, friction control and locking for maximum control and flexibility.
- 2. The **G-10X/20X** have two bubble levels (one on top and one on the clamp locking knob) for fast horizontal and vertical alignment.
- 3. Sirui's unique locking mechanism provides unequaled locking force even with loads up to 44lb (20kg)!

Monopod Tilt Head

WHY SIRUI BALLHEADS?

Each assembled component of SIRUI Ball Heads is produced by CAM (Computer Aided Manufacturing) - the ultimate in precision manufacturing techniques.

SIRUI ball heads are made of aviation quality aluminum alloy 7075-T6 and 6067-T6 for long life and maximum strength.

SIRUI uses a special manufacturing technique that produces the support ball with tolerances to within 0.01mm of a perfect sphere. This uncompromising precision guarantees **superior performance and smooth operation** for any type of 35mm DLSR or medium format camera system.

The interior locking system in SIRUI Ball Heads uses SIRUI designed double bevel locks for outstanding locking performance and reliability. Most ball heads only use a single, less efficient interior locking system.

The panning base is designed with a 360° dial. Having a **separate panning base lock knob** provides greater accuracy for panning and panoramic shooting.

The **patented safety lock design**, and SIRUI quick release plates, effectively prevent the camera from accidentally sliding off of the ball head. And most quick release plates can be used on SIRUI Ball Heads (Note: safety lock design not available from other brands).

The **custom anodized surface treatment** makes all metal surfaces highly resistant to abrasions and produces a beautiful appearance.

K-X SERIES BALLHEAD

- 1. Separate control knobs for panning and locking. Friction knob is conveniently located on the main locking knob.
- 2. Triple bubble levels allow precise horizontal leveling for critical shooting situations.
- 3. Sirui's unique locking mechanism provides unequaled locking force even with loads up to 77lb (35ka)!

Winner of Germany's Foto Magazin Tripod Quality Test - M3204

Winner of Camera Magazine Innovative Imaging Product of the Year - TX Series

5 of the Top 10 Ball Heads in Germany's "Traumflieger Test of 33 Ball Heads" are Sirui Ball Heads

What Makes Sirui Professional Ball Heads Your Best Choice?

CAM Produced

Each assembled component of SIRUI Ball Heads is produced by CAM (Computer Aided Manufacturing) - the ultimate in precision manufacturing techniques.

Aviation Grade Aluminum Allov

SIRUI ball heads are made of aviation quality aluminum alloy 7075-T6 and 6067-T6 for long life and maximum strength.

SIRUI Precision Manufacturing -0.01mm tolerances!

SIRUI uses a special manufacturing technique that produces the support ball with tolerances to within 0.01mm of a perfect sphere. This uncompromising precision guarantees superior performance and smooth operation for any type of 35 mm, DLSR, medium or large format camera system.

Panning base

The panning base is designed with a 360 degree dial. Having a separate panning base lock knob

High Quality Quick Release Plates

All SIRUI TY Series Quick Release Plates are made from forged aluminum alloy. The forging technique produces high-density metals with much greater strength than die-cast methods.

Model Specific Quick Release Plates

When using long lenses or heavy cameras, it is very important to make sure that there is a perfect fit between the camera and quick release plate. For that reason, SIRUI offers a selection of quick release plates for specific model specific for a perfect fit. types and models of cameras.

The Special QR Plates are

Sirui Designed Dual Bevel Ball Head Locks

The interior locking system in SIRUI Ball Heads uses SIRUI designed double bevel locks for superior locking performance and reliability. Most ball heads only use a single, less efficient interior locking system.

Patented Safety Lock

The patented safety lock design, and SIRUI quick release plates, effectively prevent the camera from accidentally sliding off of the ball head. And most Arca-compatible quick release plates can be used on SIRUI Ball Heads.

(Note: safety lock design not available from other brands).

Custom Anodized Surface Treatment

All SIRUI products undergo a special anodized surface treatment that makes all metal surfaces highly resistant to wear and increases durability and weather resistance. Anodizing is an environmentally safe electrochemical process. This also prepares the surface to provide better adhesion of colored finishes.

Separate adjustment knobs

Separate adjustment knobs for panning, friction control and locking, provide maximum control and flexibility.

GX Series Ball Heads

- Separate control knobs for panning, locking and friction control.
- 2. Dual built-in bubble-levels help make horizontal & vertical alignment fast & easy.
- 3. Sirui's unique locking mechanism provides unequalled locking force even with loads up to 44lb (20kg)!

KX Series Ball Heads

- 1. Separate control knobs for panning and locking. Friction knob is conveniently located on the main locking knob.
- 2. Triple-bubble levels allow precise horizontal leveling for critical shooting solution

3. Sirui's unique locking mechanism provides unequaled locking force even with loads up to

77lb (35kg)!

Conveniently hand tighten or use the included allen wrench to secure vour camera/lens onto the Quick Release Plate

Sirui 6 Year Warranty Sirui backs up its products with a 6 Year Warranty!

TY Series QR plates are designed with slide-stopping rubber mats to prevent the camera/lens from moving while tightening the screw.
